

Search by Log Time

The *Log Time* search is performed using pre-defined entries in a drop-down list, or entering a custom string.

To search by log time, perform the following steps.

1. The search string can be entered in one of two ways.
 - a. Click on the down arrow on the left edge of the **Log Time** search box.
 - i. Select the pertinent entry from the drop-down list.
 - ii. If **Custom** was selected, build the search string with the provided tool.
 - b. Type in a valid date/time string, (*e.g.*, 2015-07-01, 07/01/2015, 2015-07-01 00:00) and hit **Enter**.
2. The filter is applied and the event log list is automatically updated.
