

OVERVIEW

The *Calibrations Tab* is used for verifying and controlling analyzers and probes¹. The *Calibrations Tab*, as seen in **FIGURE ERROR! No text of specified style in document.-1**, is much like the *Overview Tab* in that the right-side pane contains all of the units for the site, and selecting those units will change the *Calibrations Tab* contents.

The center pane of the *Calibrations Tab*, as seen in **FIGURE ERROR! No text of specified style in document.-2**, contains data lists presenting all of the calibration items for the selected unit. The end-user information such as the status of the last instrument calibration; when the calibration took place, whether or not the instrument is online, and whether the instrument passed calibration; along with expected values, measured values, limits, and other pertinent information regarding the instrument's calibration procedure.

¹ Depending on roles and rights user may not have the listed options.
