

8.8.3 For units using the Appendix D and E methodologies:

- A written record of the fuel flowmeter accuracy test procedures, including (if applicable) transmitter calibration and visual inspection procedures;
- A record of all adjustments, maintenance or repairs of the fuel flowmeter monitoring system;
- A written record of the standard procedures used to perform the periodic fuel sampling and analysis;
- For Appendix E units, a list of the operating parameters that are continuously monitored, and acceptable ranges for the parameters; and
- A record of the procedures used to perform the required Appendix E NO_x emission testing.
