

Adding an End-User Message

The *CEM Log Sub-Tab* allows for adding end-user messages which will also show up in the *Daylog*. To add an end-user message, perform the following steps.

1. Select the **CEM Log Sub-Tab**.
2. Click on the **Add** button in the lower right corner of the sub-tab. A pop-up will appear on the window called *Add New Daylog Message*, as seen in **FIGURE ERROR! No text of specified style in document.**-1.

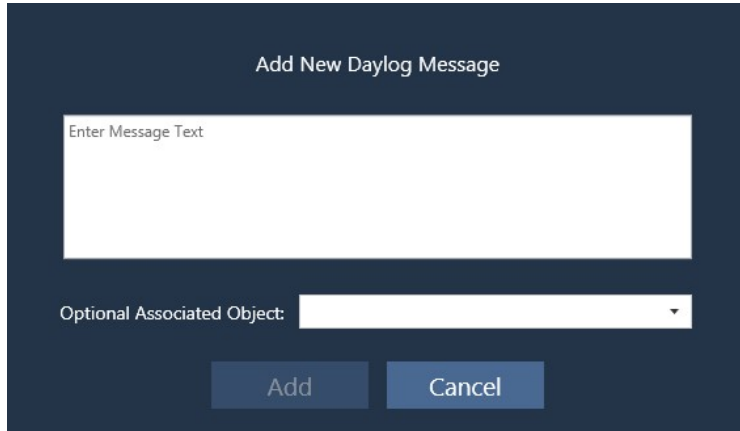

The image shows a dark-themed pop-up window titled "Add New Daylog Message". Inside the window, there is a large white text input field with the placeholder text "Enter Message Text". Below this field is a label "Optional Associated Object:" followed by a white dropdown menu. At the bottom of the window, there are two blue buttons: "Add" and "Cancel".

3. Enter a message.
4. Select an *Optional Associated Object*.
5. Click on the **Add** button. The message will now show up in both the *CEM Log* and the *Daylog*.
