

Search by Source, Business Object, Reporting Group, or Message

The search is performed using pre-existing entries in a drop-down list, or entering a custom string.

To search by source, perform the following steps.

1. The search string can be entered in one of two ways.
 - a. Click on the down arrow on the left edge of the appropriate search box.
 - i. Select the pertinent entry from the drop-down list.
 - ii. If **Custom** was selected, build the search string with the provided tool.
 - b. Type in a valid string and hit **Enter**.
2. The filter is applied and the event log list is automatically updated.
