

OVERVIEW

The *Alarms Tab* provides access to system alarms, as seen in **FIGURE ERROR! No text of specified style in document.**-1. The *Alarms Tab* allows any alarm to be explored for occurrences, and acknowledged if required. The *Alarms Tab* differs from previous tabs in that the selection of the *Reporting Group(s)*, takes place in the top row of the pane, along with providing the ability to filter on *Alarm Types*. Alarms may also be searched from within the *Search* box, also located in the top row.

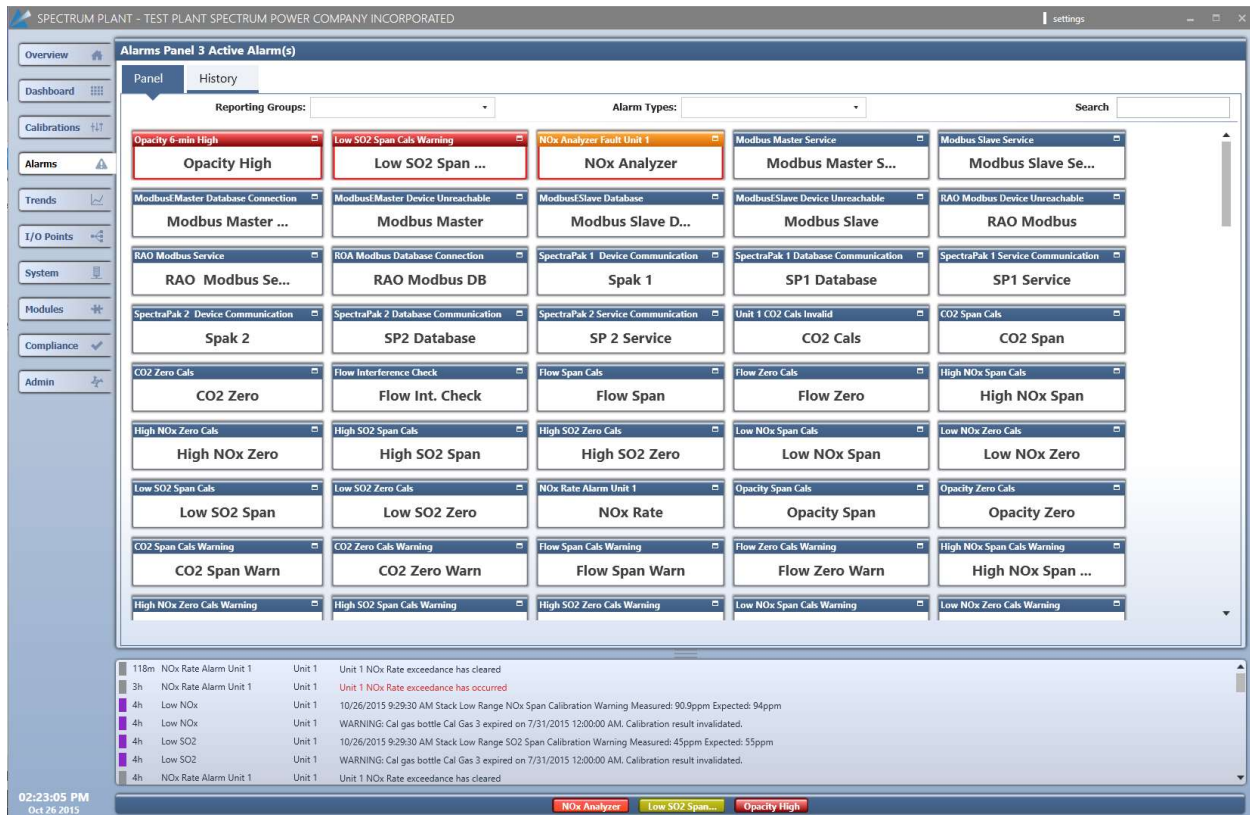

Figure Error! No text of specified style in document.-1 Alarms Tab

The *Alarms Tab* contains two sub-tabs, *Panel* and *History*, each offering up a historical view of alarms that have been raised.
