

OVERVIEW

The *I/O Points Tab* allows the end-user to observe the data from the system *Sources*, to include data from the *SpectraPak®-E* and *Modbus* devices, etc., as seen in **FIGURE ERROR! No text of specified style in document.-1**. The right side of the *I/O Points Tab* contains all of the *Sources* in the system. By selecting one of these sources, the end-user can view all of the I/O points associated with that source.

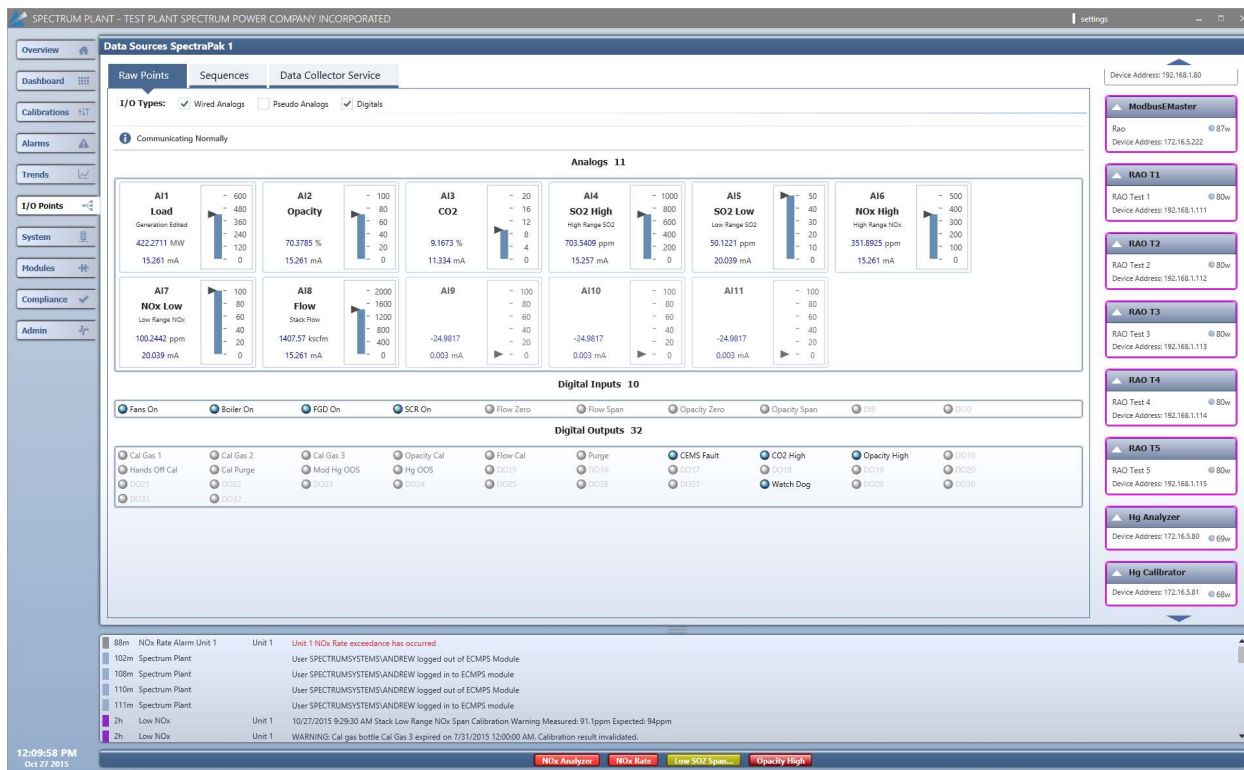

Figure Error! No text of specified style in document.-1 I/O Points Tab

There are three sub-tabs contained in the *I/O Points Tab*. They are the *Raw Points* sub-tab, the *Sequences* sub-tab, and the *Data Collector Service* sub-tab. An explanation of each follows.
