

6.6.2 *If the NO_x emission rate is based on historical CEMS data:*

- Use the 95th percentile value from each fuel-specific data set as the default NO_x emission rate, with one exception—for units equipped with SCR or SNCR, if the 95th percentile value is less than 0.15 lb/mmBtu, use 0.15 lb/mmBtu as the default NO_x emission rate.
