Application Messages

The *Application Messages Tool* in the *Admin Tab* allows the Administrator to view, or *Add* site-wide *CEMS* messages which are broadcast to every end-user, immediately, as seen in **FIGURE ERROR! No text of specified style in document.**-1.

Application Messages

| Added By	Effective Date	Expiration Date	Reporting Group	Current Sessions Only?	Message
LZ-LAPTOP\LANDON	8/13/2015 5:41:21 AM	8/13/2015 5:43:20 AM		☑	test

*Figure **Error! No text of specified style in document.**-1 Application Messages Tool*

New messages flash at the top of the window, in the *Title Bar*, and the end-user has the ability to delete those messages after viewing.

The *Application Messages*, at addition, can be set to expire in a set number of minutes, on a certain date/time, or after the current end-user session is ended.
